GET TO KNOW US

40 YEARS AND COUNTING

From humble beginnings as a small, contract programming firm and consulting business in 1980, Gartman recently celebrated our 40th anniversary in July of 2020 and remain a family owned and operated company to this day.

Gartman primarily focused on technology aimed at the distribution of flooring products during the early years and because of our level of industry knowledge - in the decades to follow we enjoyed many firsts servicing the technology needs of the floor covering industry. These include radio frequency warehouse automation, electronic proof of delivery, dealer specific price lists, cutting machine automation, and more.

Today, Gartman's custom designed ERP software solution and flagship product, **Gartman Distribution Management Software (DMS)**, specifically built to meet the needs of the flooring distribution market, continues to be the #1 choice of wholesale flooring dealers.

And while we service some of the largest and most reputable wholesale floor covering businesses throughout the United States and Canada, we support both large and small distributors, ranging from a single warehouse with 20 users to dozens of branches with hundreds of users.

Longevity with customers has been a cornerstone of our company's culture, as many of Gartman's customers have done business with us since our very early years. We proudly boast several 20 and 30 plus year partnerships with our clients, while remaining dedicated to company growth through the acquisition of new customer partnerships as well.
